

EPPORA Literature

EPPORA (Enterprise Project Portfolio Optimized Resource Allocation) is a project portfolio tool that supports organizations conducting successful projects. Its major features include:

- Project Selection
- Project Requirements Specification
- Project Scheduling
- Project Cost
- Project Workflow
- Warning Messages (e.g., deliverable task projected date will be missed)
- Staff Productivity and Cost Effectiveness Analysis
- Optimal Labor Resource Allocation Across Entire Project Portfolio

The following links are marketing documents describing EPPORA's features. The last document is an excerpt from the EPPORA User's Guide describing EPPORA's major concepts.
